

FLM-GO LLC A SUBSIDIARY OF SSU

**EV Charging**

# ABOUT

FLM-Go LLC specializes in EV charging design build for existing commercial properties. We have a team established to execute EV charging projects from start to finish: EE for plans to permit, master electrician/estimator, master electrician/foreman. If done correctly, the electrical infrastructure for EV charging units will exist for the life of the property regardless of advances in charger hardware/software. FLM-Go LLC strives to provide lasting solutions that add \$\$ increase to property value.

SUMMER 2023  
PROJECT AT THE  
LARGEST RETIREMENT  
COMMUNITY IN  
FLORIDA

STARTED OFF WITH (3) ONE FOR  
ONE REPLACEMENTS

*Utilized SemaConnect*

*(now Blink)*

*Series 8 with cable reel*

**Old Unit**

**New Unit**

# Design build for New EV Charging Units

1. Calculated load of existing power and needs of (6) additional Dual station ev chargers.
2. Designed subpanel to connect to existing main and disconnect in order to feed new ev charging units.
3. Laid out new ev charging units locations.
4. Located existing underground utilities and laid out trench path for conduit feeds from subpanel to new ev charging units.

**Subpanel to feed  
EV chargers**

***Subpanel  
And  
Conduit  
Out to  
EV chargers***

**Conduit run out to  
EV chargers**
